

Maintenance Schedule Sample

Example operating rhythm tailored per surface at handover

Weekly

Visual inspection, debris removal, litter collection, localised brushing in high-traffic zones and reporting of damage, contamination or vandalism.

Monthly

Power brush fibres, redistribute infill, check line marking, inspect seams and edges, clear drains and record maintenance activity.

Quarterly

Decompaction where required, infill top-up assessment, moss and weed treatment, drainage performance review and defect register update.

Annually

Full condition inspection, performance review against intended use, written asset report and forward maintenance recommendations.
